

Purpose in Life

It's interesting when you have a conversation with someone that has a vision for his life or when a person is looking for his purpose in life. But what's more amazing and fantastic is when we are able to find that purpose; when we know that we are part of something great, that our time here on earth is not only meaningful and that we are not just created equal, but we are here to fulfil a destiny, to impact our surroundings, the people near us, and the ones that we may never meet or see or have a conversation with. Whatever purpose we are here for, I want to concentrate on the word VISION and its meaning:

the act or power of sensing with the eyes; sight.

the act or power of anticipating that which will or may come to be: *prophetic vision; the vision of an entrepreneur.*

an experience in which a personage, thing, or event appears vividly or credibly to the mind, although not actually present, often under the influence of a divine or other agency: *a heavenly messenger appearing in a vision.*

When we apply this definition to what we have inside of us, vision is a powerful tool. It is a powerful internal explosion and we can use it to attain our desires. Each time I have conversation with different people from different countries I have the opportunity to listen to their vision and how they want to improve conditions around the world, particularly their surroundings. It is very powerful and very encouraging to know that we still have people with great vision. That is how the world was created. God had a vision to create us and the universe. This is the reason that the universe is so perfect and beautiful; because he gave us everything that was inside of Him. When you have a vision- the moment that vision comes into focus- you want everything you create to be perfect, beautiful and wonderful for the eye. That's why we are still amazed at the technology that we enjoy today, and the wonderful enterprises that people have created such as Disney, Microsoft, CocaCola, and lots more.

Never feel deflated when someone call you crazy because you had shared your vision with them. That is just a confirmation that you have a vision and that you have a purpose in your life. Many great men and women were called crazy because they have transformed and revolutionized the world with their vision. Today we still enjoy those special people willing to risk everything just for one day of success. I feel blessed to hear these people share their visions with me. I feel that those people are needed today more than ever, for with just a fraction of their thoughts the world can be different and better.

Today is a great day, because I am able to share this writing with you. If you are reading this and feel that you have a vision, please send me an email and share it.
